

AKOMA Dog Products Hound Warmer Deluxe

Select the temperature most suitable for the animal's requirements and environment. The Heating Pad can be used with the 12V power supply from a vehicle by plugging in the cigarette plug and then connecting the cable to the connector coming from the Controller. The Heat Pad can also be used where 110V AC power is available by plugging the 110V cable into the connector coming from the Controller and then plugging the cable into a 110V AC outlet (when using a 110V AC supply make sure the high voltage cable is not accessible for the dog to chew). It features a programmable thermostat where you can set the temperature and even set the timer to heat one to 12 hours! It also has a timer that will switch off the heat mat after the selected time has elapsed. After use wipe the Pad with a damp cloth and allow to dry. Do not submerge in water.

Range of 95 -122 degrees F with default temp of 104 degrees F

- Uses 15W of power
- Safe to use all night
- Adapter clips included so it can run off a spare battery
- Includes 12VDC and 110VAC Adapters

Fabric Care Instructions: Hand Wash
